SKILLS

PROGRAMMING LANGUAGES
Java • Javascript • Python • HTML • CSS • Rust • SQL

TECHNOLOGIES
Java Spring • Django • Node • Angular

TOOLING
Docker • Jenkins

LANGUAGES
Japanese (intermediate)

EXPERIENCE

GOOGLE | Senior Software Engineer
April 2024 - Now | Seattle, WA

- Transformed Google Workspace for Education counter abuse response from manual escalations to an automated scaled response through building a customer classification platform
- Ideated, proposed, and implemented classification heuristics enabling 100k+ customer suspensions with less than 1% false positive rate
- Aligned low cost collaboration interfaces across product organizations and Support, Privacy, and Legal teams

GOOGLE | Software Engineer III
Jun 2022 - April 2024 | Seattle, WA

- Designed and implemented Google Workspace for Education false positive suspension detection to prevent loss of over $10 million in annual revenue and over 3 million monthly active users
- Implemented dynamic product limits preventing 100 million abusive users a year from being created
- Managed urgent abuse incidents costing up to $9 million a year

QUALTRICS | Software Engineer II
October 2019 - August 2021 | Seattle, WA

- Collaborating across 4 teams, I led designing and implementing Qualtrics' platform solution for assigning sentiment to survey choices
- Designed and delivered the dynamic benchmark product feature allowing dashboard users to compare data across their organization
- Modeled complex employee engagement use cases, data, and API for Qualtrics' survey invitation link creation and authentication service

QUALTRICS | Software Engineer I
July 2017 - October 2019 | Seattle, WA

- Migrated Employee Experience dashboards PDF exports from a custom solution to a platform, and found an optimization halving the number of data requests
- Implemented 2 widgets for visualizing data utilizing D3 and Angular making up 53% of widget creation on Employee Experience dashboards
- Proposed Jest API tests adopted across the organization increasing the number of API tests in a quarter by 36% (780 to 1068)
- Drive operational improvements of 4+ services through metrics, alerting and on-call

WIZEHIRE | Software Engineering Intern
June 2016 - May 2017 | Austin, TX

- Constructed an automated reminder to finish applications e-mail increasing completion rate by 10%
- Overhauled the mobile application experience improving job seeker conversions by 100%
